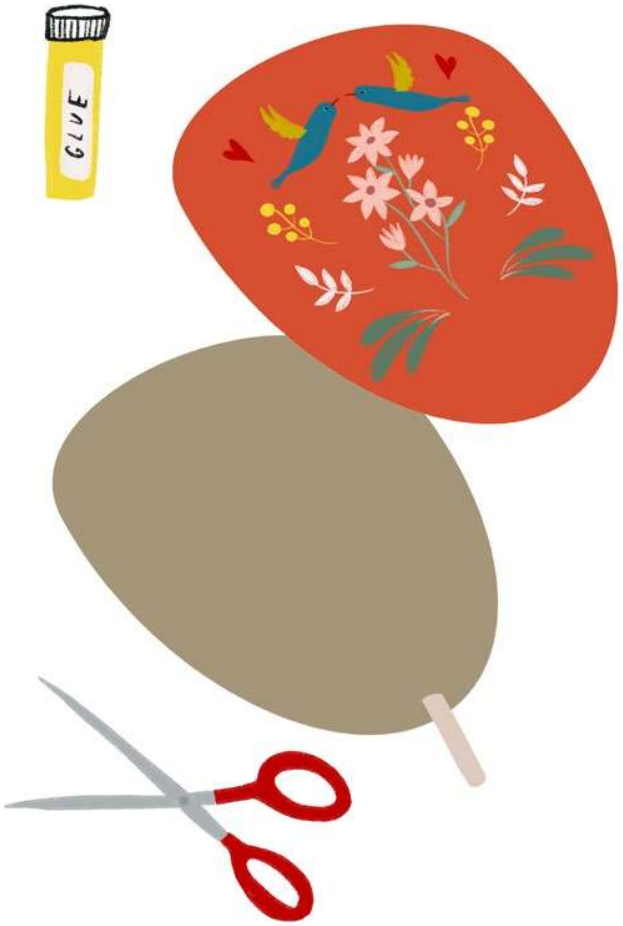
paper paddle fan

Materials:

Scissors
Printed Template
Glue
Popstick
Cardboard



Instructions:

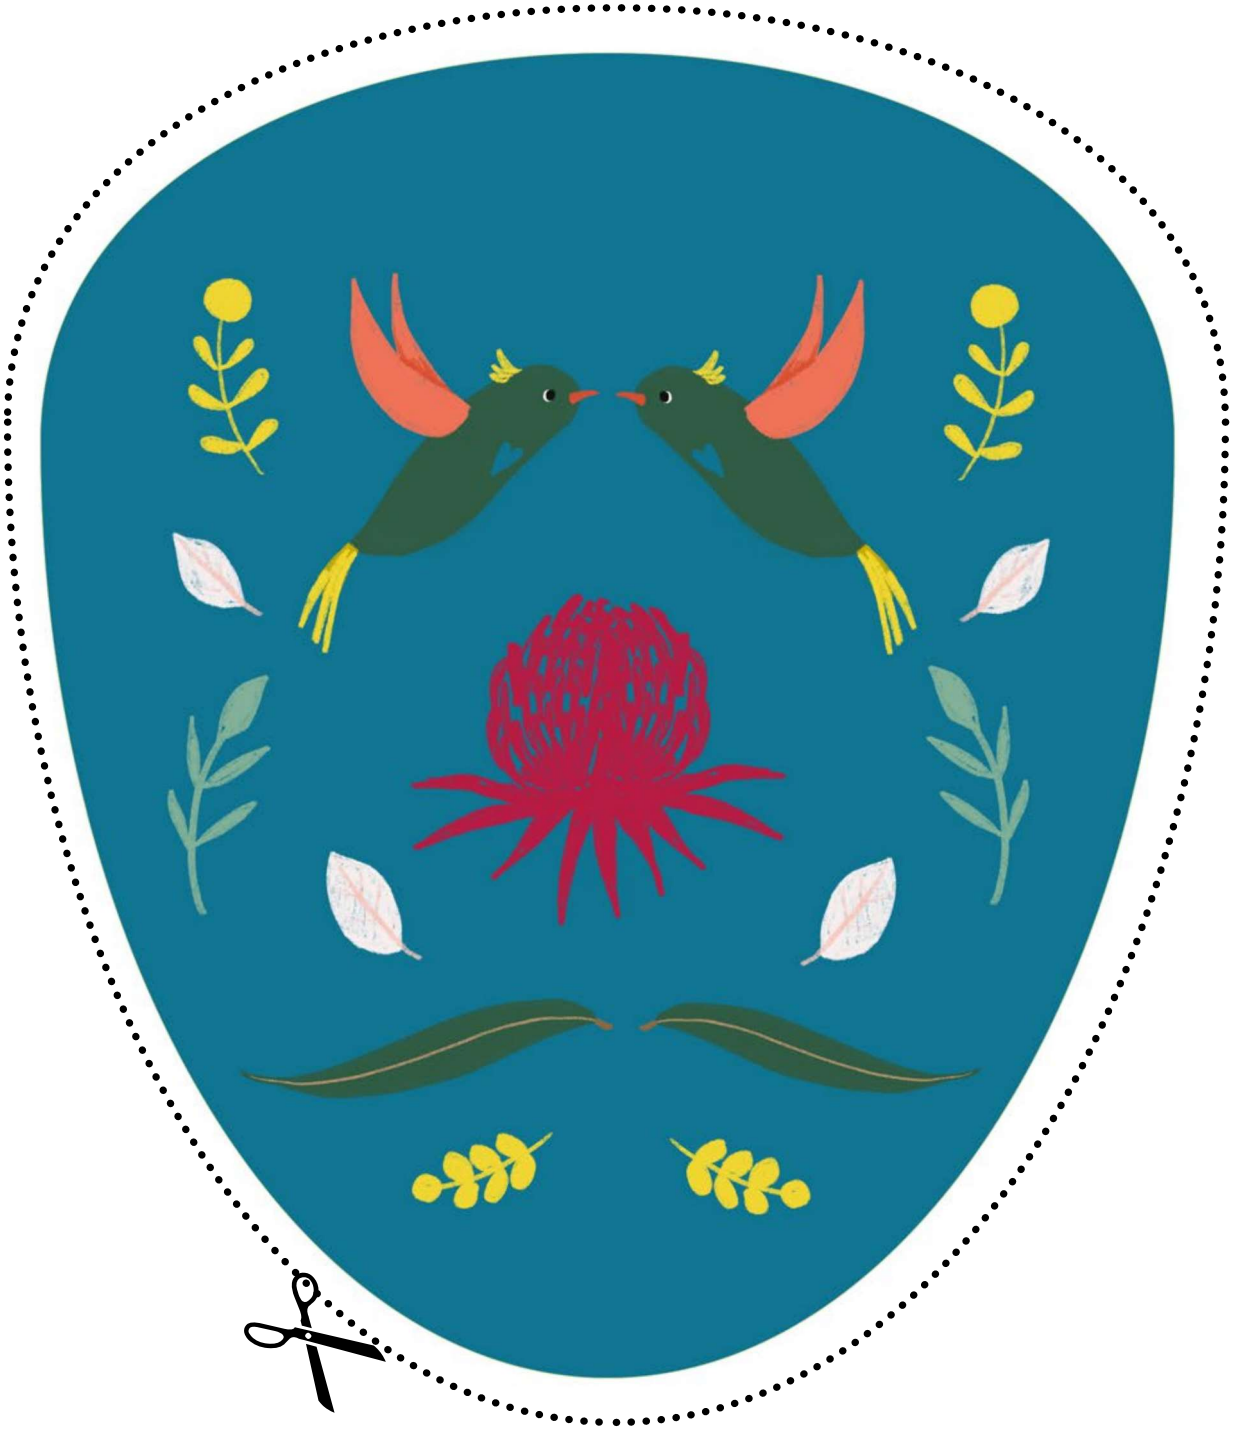
Step 1: print your template and glue the printed page to cardboard

Step 2: cut around the templates *and* cardboard once dried

Step 3: sandwich a popstick between the two cardboard sides, and use glue to secure it. Both sides of cardboard are now glued together around the popstick, with your design on each outer side.

Step 4: allow your fan to dry, then its ready to cool you!

Template



glue your full page to cardboard,
then once dry cut around the design

Template

glue your full page to cardboard,
then once dry cut around the design
