

Materials Required

Scissors

Glue stick

Chart Paper

Straws

Tape

Balloons
(small/medium size)

Steps to follow

1. Cut the different organs given in the activity cutout sheet along the dotted lines.

2. Take 2 balloons and cut off the thick part at of the balloons

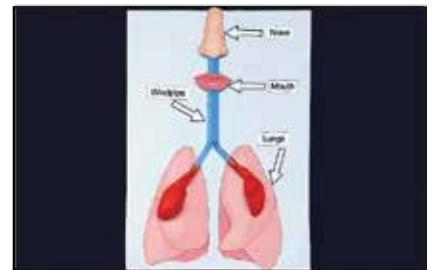

3. Insert the balloons in the straws and secure them with the help of tape to make an airtight setup.

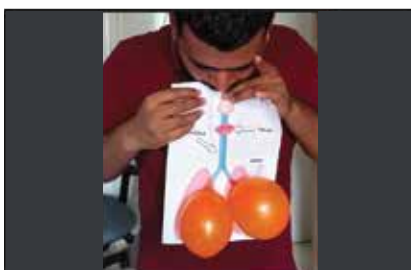

4. Stick the straw and balloon setup on a chart paper.

5. Stick the nose and lip cutout on the chart paper over the straws as shown in the picture.

6. Stick the lungs just below the straws and stick labels as shown in the picture.

7. Blow air through the straw openings to inflate the balloons.
