

Materials Required

Scissors

Crayons

Tape

Stapler

Markers

Glitters (optional)

Pipe Cleaner

Glue stick

Straws
(one with a larger diameter
than the other)

Steps to follow: To make the butterfly

1. Cut out the front and back side of the butterfly given on pages 3 and 4. Also cut out the shapes given on pages 5 and 6.

2. Stick the front and back sides with the blank sides inside. Stick the cutouts on the butterfly and decorate both sides using markers, crayons, and glitter (optional).

3. Fold the butterfly in half along the centre line, and fold the wings back along the outer lines.

4. Staple the folds together.

5. Punch a hole as shown in the picture. Pass a pipe cleaner through it and twist it to make the antennae.

6. Cut and split the smaller straw at one end as shown in the picture and tape it to the butterfly.

7. Cut and split the large straw at one end, the cut being longer than the smaller straw. Cut the larger straw from the other side so that it is a little shorter than the other straw.

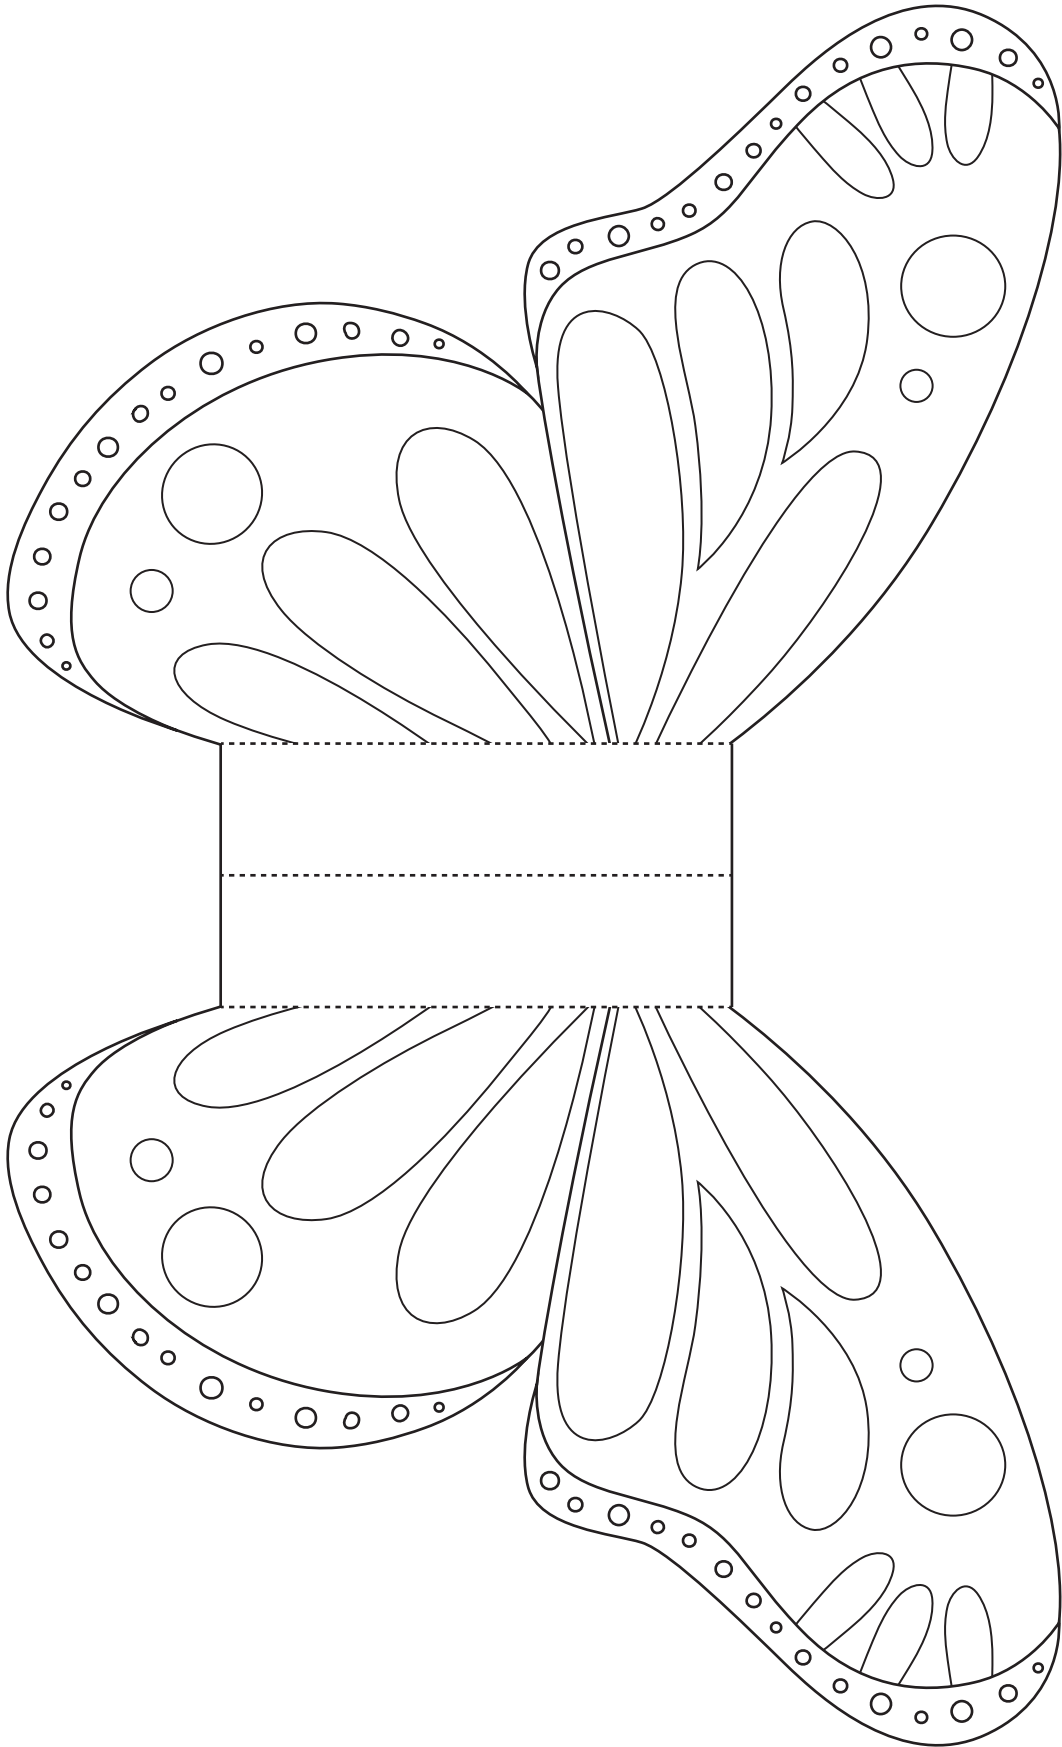

8. Tape the larger straw to the butterfly as shown in the picture.

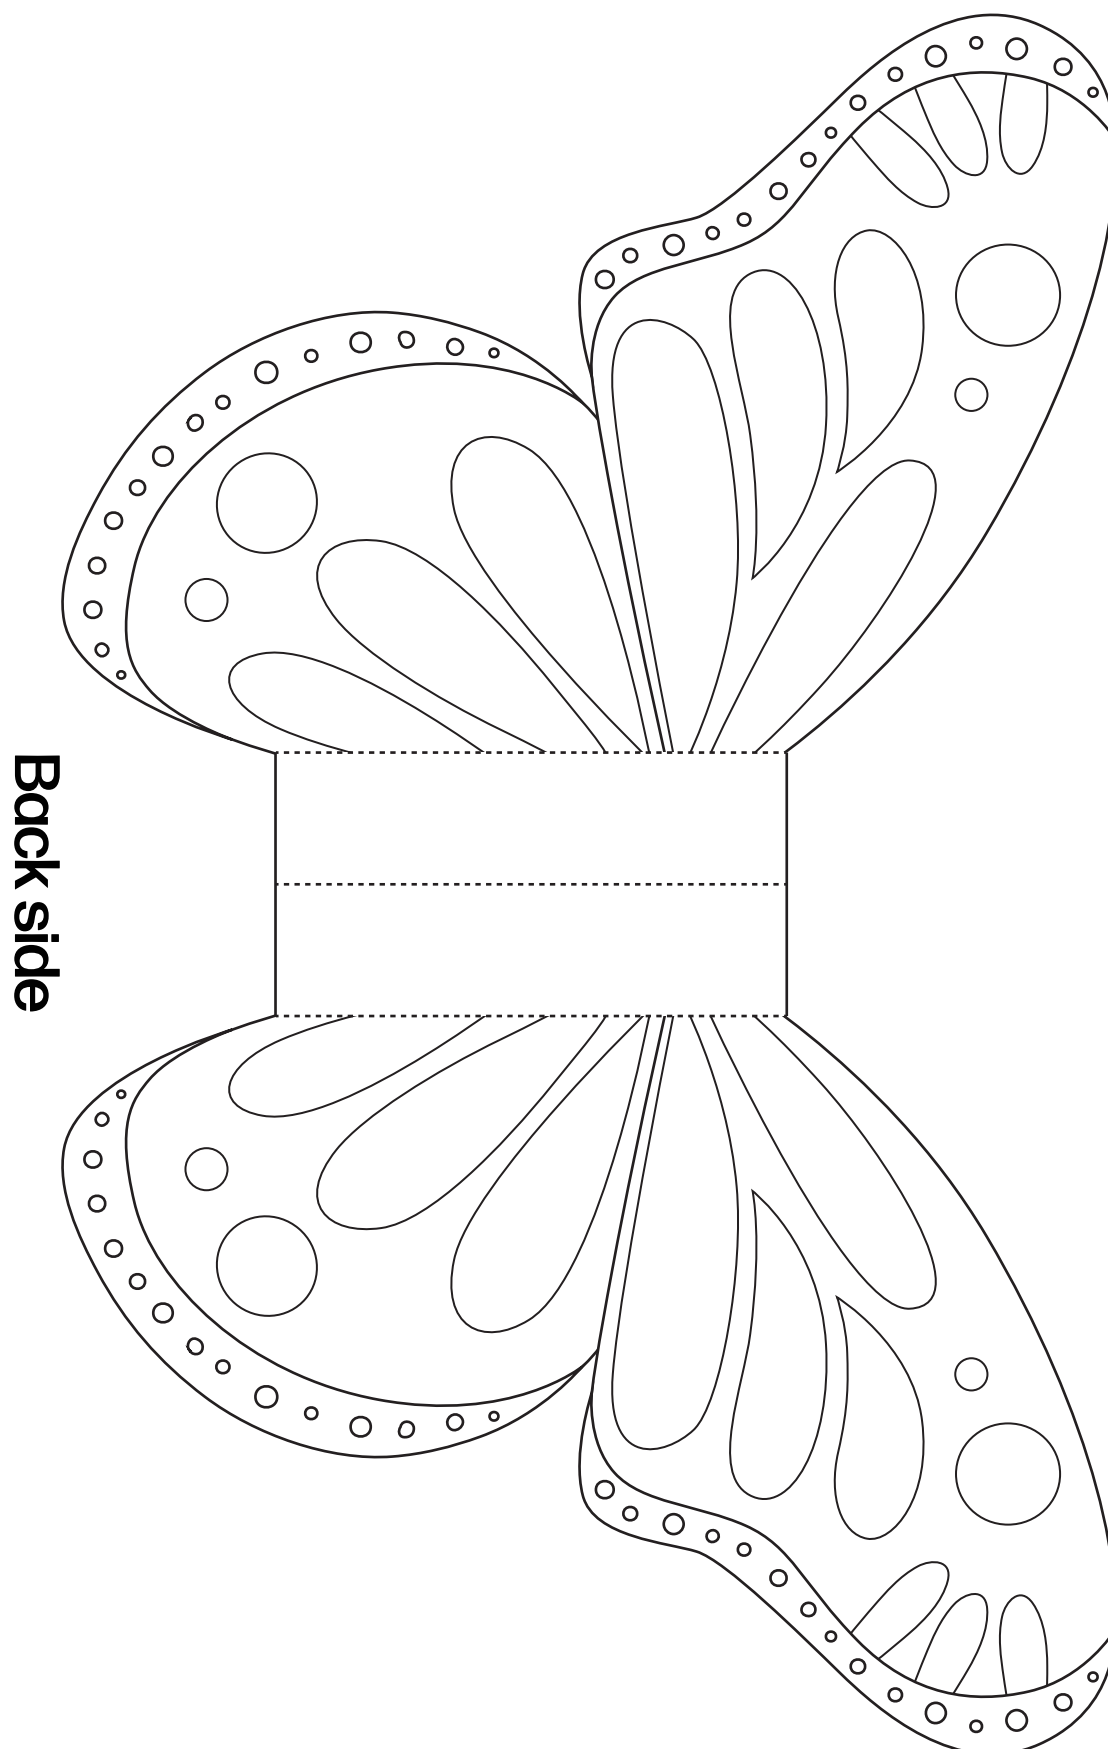

9. Slide the straws one over the other to make the wings flap.
