

## Materials Required

Scissor

Straw

Pencil

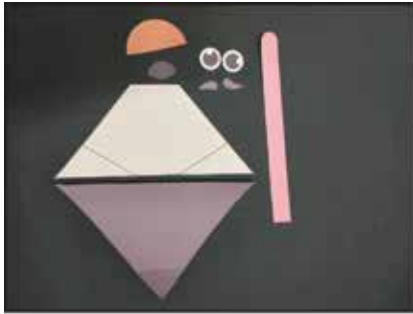

Glue stick

Tape

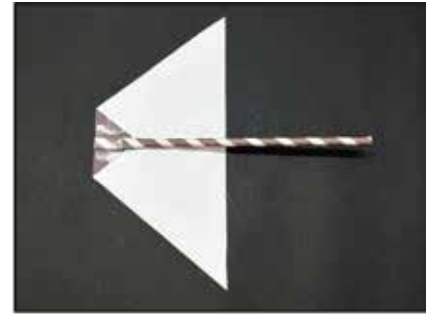

## Steps to follow

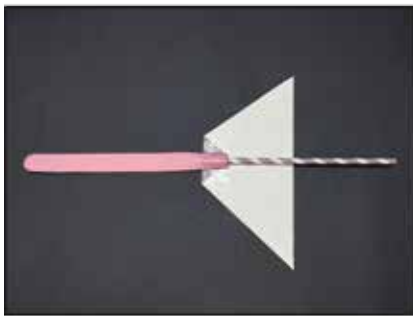

1. Cut out all the shapes given in the worksheets.

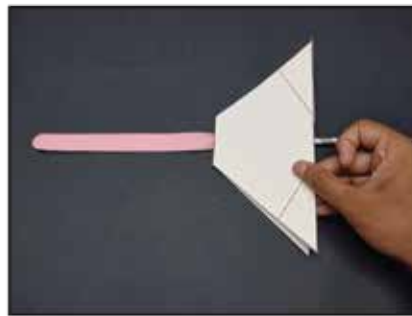

2. Take the triangle and keep it upside down so that the white part is facing you. Fold it along the dotted line, as shown in the picture.

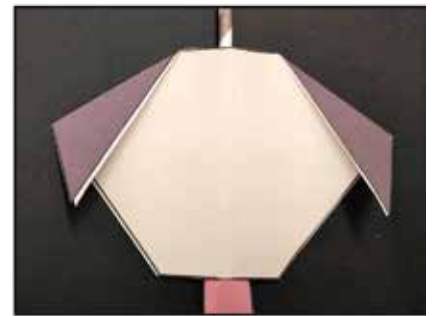

3. Place the straw in the centre of the folded part and secure it with the help of tape.

4. Stick the tongue strip on top of the straw with the help of glue.

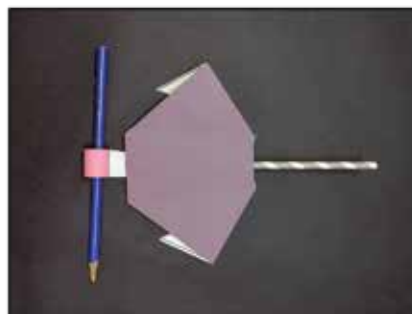

5. Using glue, stick the other triangular-shaped cutout as shown in the picture.

6. Fold inward along the dotted lines to make the ears.

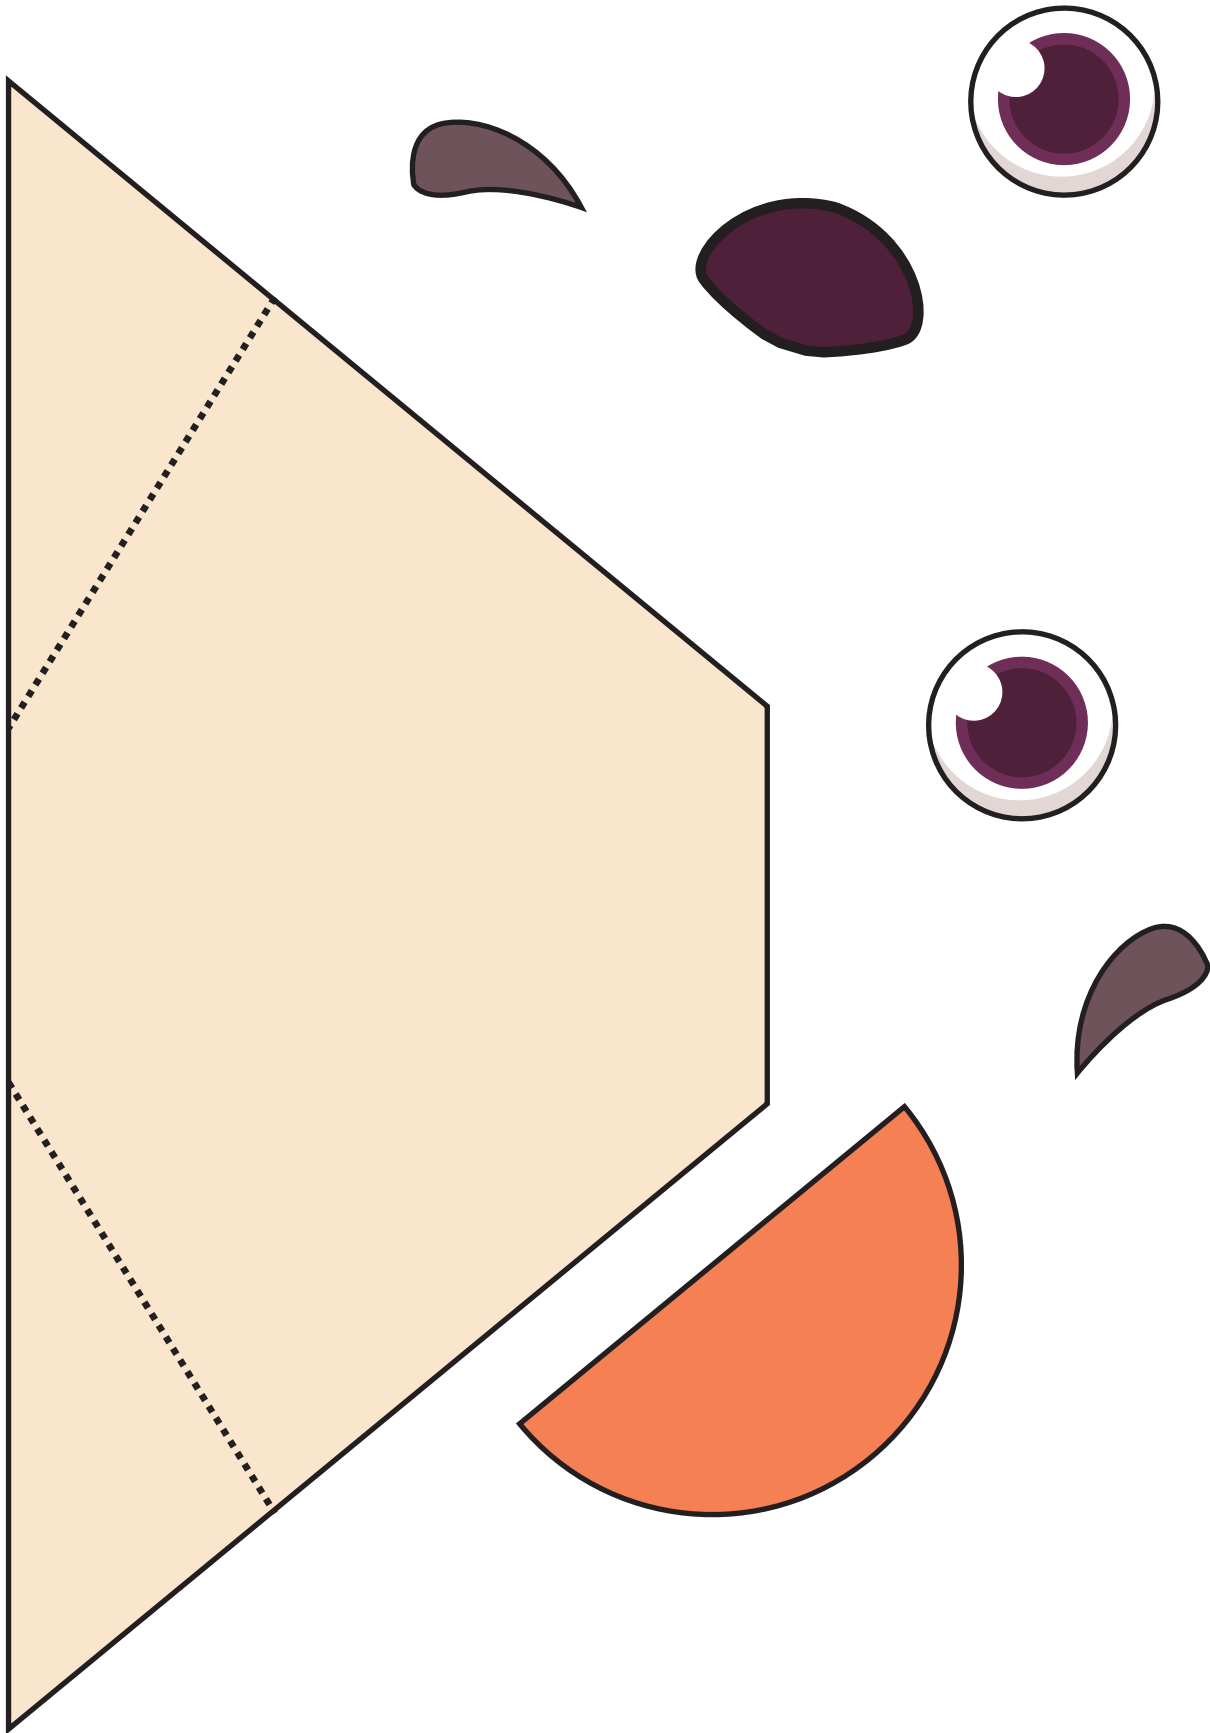

7. Stick the eyes, nose, and shape below the ears.

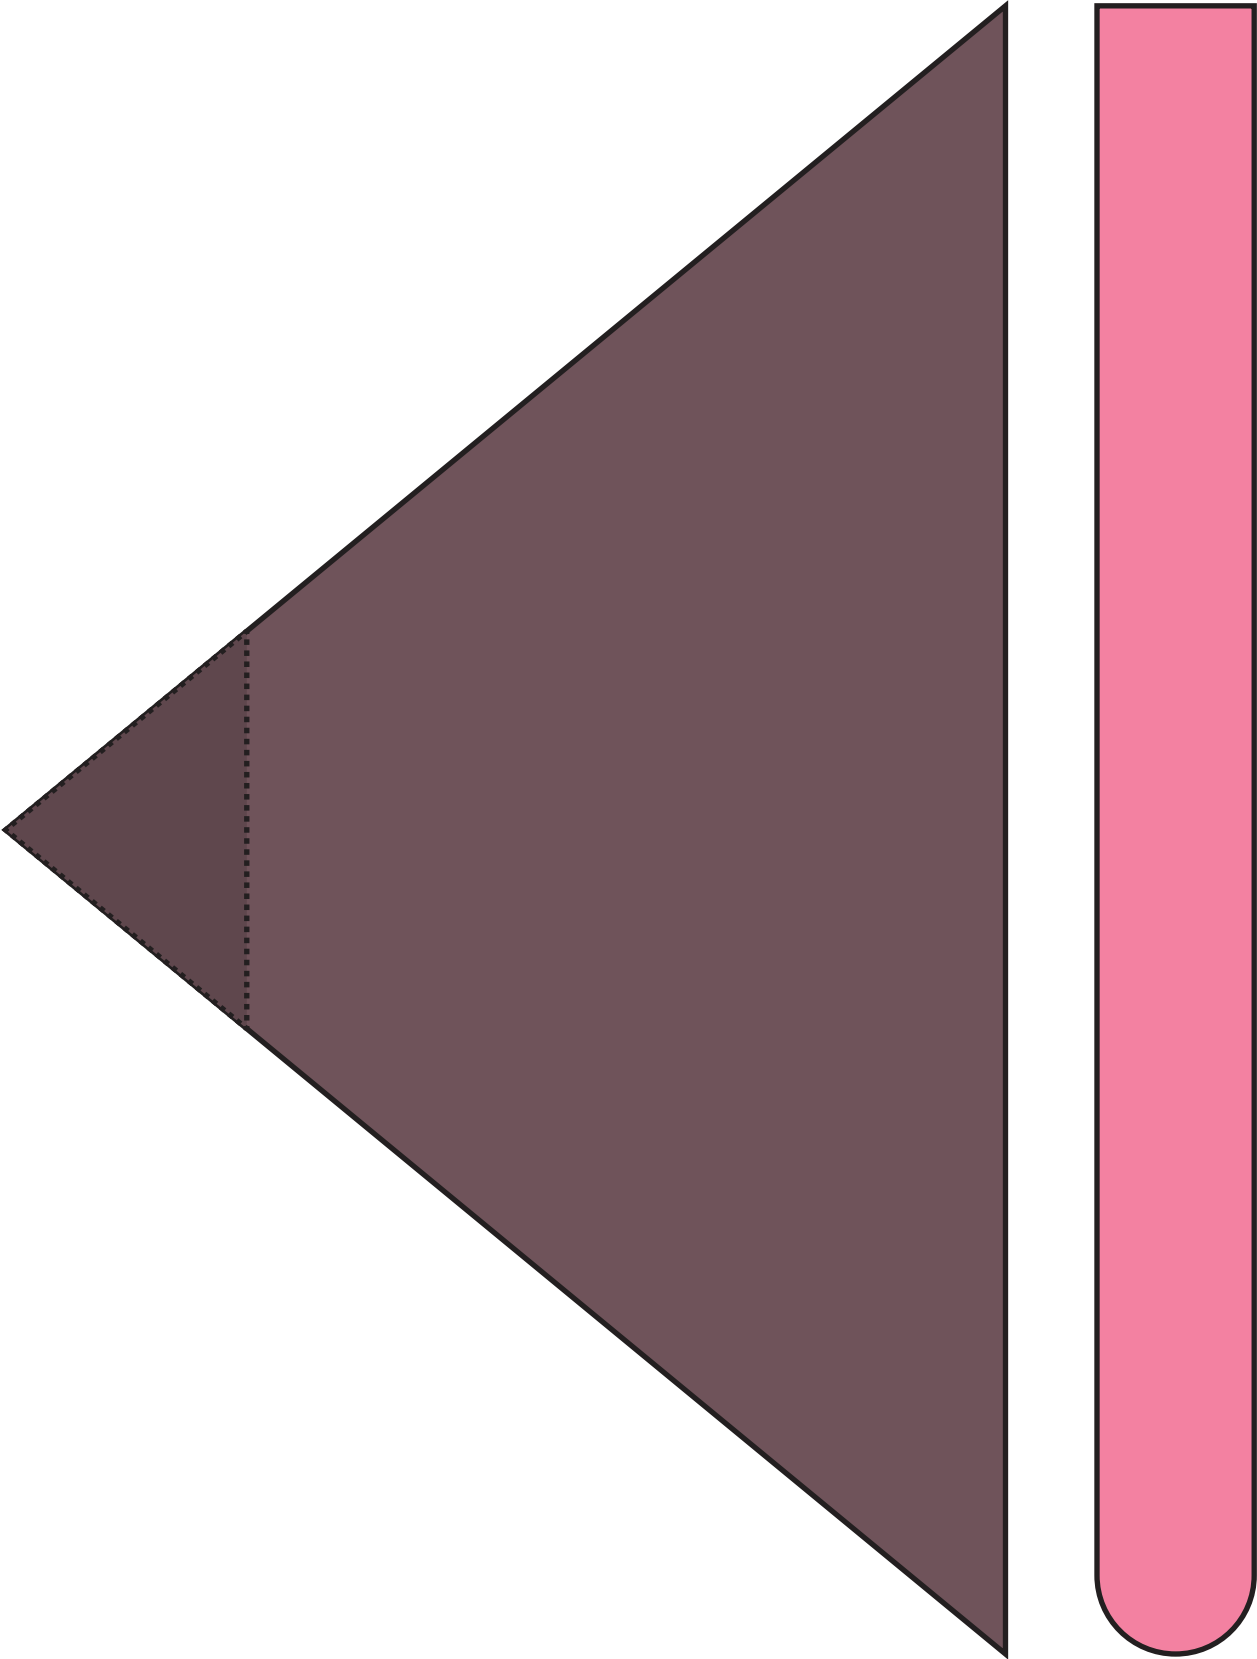

8. Keep the dog's face towards the table. Using a pencil, roll the tongue strip until you reach the face.

9. Remove the pencil and blow on the straw. Your dog, with a moving tongue, is ready.
